Exam: CHEST PA Chest PA/AP

Ref. Physician: Dr.SANTOS HILDEGUNDA C 17

Att. Physician:

Request Num: 318336

Resident Name:

HMO: MEDICARD PHILIPPINES INC.

Exam Date: 2/20/2016

Result Date: 2/21/2016 6:09:56 AM

Registration Num: 634908

Technologist: NEBRIJA ARTEMIO

Reason for Exam: Reason: COUGH . Surgical reason: . Upper Respiratoy Tract Infection VS Community
Acquired Pneumonia

REPORT

CHEST PA:

Follow-up study to that done March 5, 2015 , again reveals the right apical pleural thickening.
The small nodular opacity is barely visible at the left lung base.
Bronchovascular markings are prominent.
The heart is not enlarged.
Hemidiaphragms are low in level.
Bony thorax is unremarkable.

IMPRESSION:

STABLE RIGHT APICAL PLEURAL THICKENING AND TINY NODULE IN THE LEFT LUNG BASE SINCE
STUDY OF MARCH 2015.

BRONCHOVASCULAR PROMINENCE MAY BE DUE TO BILATERAL BRONCHITIS OR AGE-RELATED
CHANGES.

PULMONARY HYPERAERATION.
